

Turing – the Strategic Solution Partner for CXOs

BUILT ON THE LARGEST INTELLIGENT TALENT CLOUD PLATFORM, PROVIDING ACCESS TO THE WORLD'S TOP 1% OF AVAILABLE SOFTWARE TALENT

OVERVIEW

Turing is a Tech Unicorn that harnesses the power of software to build and scale engineering teams. Turing has created the first and only Intelligent Talent Cloud – a distributed team of developers sourced by software, vetted by software, matched by software, and managed by software. With a 97% Engagement Success Rate and with the lowest industry attrition rate of 8%, our AI-based platform efficiently provides customers with custom micro-targeted matches from over 2 million Turing developers – reducing time to hire and providing the ability to scale projects quickly. Turing ensures full transparency by providing access to each talent's verified deep developer profile, workspace, and team dashboard.

Over 300 US-based companies such as Disney+, Johnson & Johnson, Volvo, Dell, and Pepsi have used Turing to build teams for critical software projects.

WHAT WE DELIVER

Cloud Ramp Up

- Cloud Foundations
- DevOps practice
- DevSecOps practices

Applications

- Application Modernization
- Application Development
- Application Design

Data

- Database Migration
- Data Warehouse Modernization
- Database assessments

AI / ML

- Program Machine Learning
- Deep learning
- IoT

4500 Certified Cloud Professionals

Self-Serve Model

300+ Clients

26,135 Certified IT Professionals

97% Engagement Success Rate

Turing Intelligent Talent Platform

“Turing: the new-age strategic partner-platform in building a globally distributed team”

ENGAGEMENT MODELS

Managed Teams

Turing offers engineering leaders the option to offload the burden of managing day-to-day activities including hiring, onboarding, retention, and roll-off. Turing handles the entire lifecycle of managing the project right from hiring to reporting to continuous improvements.

Turing Portal

For leaders who prefer a “hands-on” approach, Turing offers exclusive access to a pre-vetted pool of IT talent via our SaaS Talent Cloud— allowing hiring managers to view metrics and live coding challenge results for each developer. With just a push of a button, schedule an interview with the developer you like; then hire and manage their day-to-day work activities the way you would with your in-house FTEs.

THE TURING GUARANTEE

SPIN UP YOUR ENGINEERING DREAM TEAM WITH TURING’S AI-ENABLED INTELLIGENT CLOUD PLATFORM.

A powerful platform delivering the highest quality solutions, regardless of your project requirements. The software engineering team you create with us will feel and operate like an extension of your own team. Imagine a plug-and-play solution, but better, faster, and more efficient!

AGILITY & FLEXIBILITY

Turing has a proven track record of seamlessly integrating our teams into existing organizations with speed and precision. Turing’s flexible model allows you to scale your team up or down as you transition between delivery milestones or when you need niche experts during relevant phases of your project.

GLOBAL TALENT WITH HIGHER COST-TO-QUALITY OPTIMIZATION

Turing helps build and supplement project-based teams, providing termed resources for specific roles or entire teams. Hire specialized, Silicon Valley-caliber engineering teams that can deliver results within your budget and timelines.

COMPLETE CURATION AND END-TO-END MANAGEMENT

Turing provides a fully managed solution where we build and manage a project team based on your initiative, small or large, with complete flexibility to customize the product ownership roles. A dedicated Manager will be working with you to understand your goals, needs, and team dynamics to curate the perfect team for your needs.
