Camelot Secure CMMC eDiscovery Solution

Eliminating the cost, time and complexity of complying with federal cybersecurity mandates.

Stanford Oliver, President/CEO and Founder of Camelot

Entrepreneur, technologist, aerospace, and cybersecurity.

- Over 40 years in military, intelligence, and cybersecurity.
- 20 years of military service as an Army Aviator and Blackhawk Helicopter Pilot.
- Roles held include: Army Staff, 101st Airborne Division, 1st Armored Division, U.S. Army European Command, 10th Mountain Division, U.S. Army Security Assistance Command, U.S. Army Test and Evaluation Command.

Founded DigiFlight, Incorporated in 1999.

Jacob Birmingham, VP of Product Development

- Over 20 years as an Information Systems Expert, Cybersecurity professional and ethical hacker.
- Leads Camelot Secure's Advanced Persistent Threat Hunt Team.
- Certified as a CISM and CISSP.
- BS in Computer Engineering, University of Central Florida.
- Master Degree in Management Information Systems, University of Alabama in Huntsville.

Who Is Camelot Secure?

**A Company with a Revolutionary and Disruptive Approach to Cyberspace & Cybersecurity Operations**

►People, Processes, Technology, and Innovation

►World-Class Workforce with a Special Operations Cyber Mindset (Seal Team 6/
Delta Force of Cyber)

►Secure360 – A Unified and Integrated Cybersecurity Platform

Core Operational Missions

►Adaptive Threat Intelligence (Intelligence360)

►Advanced Persistent Threat Hunt

►Security Compliance (PCI-DSS, HIPAA, NIST, CMMC)

►Training & Testing as a Service (T2aaS)

Additional Services

►Security Operations Center as a Service

►Cybersecurity Advisory Services

"Critical Alert: Federal Contractors Are The Unwitting Trojan Horses of Cyber Crime!"

- The Defense Industrial Base (DIB) is comprised of over 1 million individuals who are targets for cyber crime. [1]

- The Department of Defense (DoD) systems continue to be the target of cyber attacks, as there has been well over 12,000 cyber incidents in the past decade.

DoD's CMMC Program: Ensuring Cybersecurity in Defense Contracting

The DoD Cybersecurity Maturity Model Certification (CMMC) program:

- Protect American ingenuity and national security.
- Reinforce the importance of DIB cybersecurity for safeguarding information that supports and enables our warfighters.
- Assures that contractors are meeting the cybersecurity requirements that apply to acquisition programs and systems, that process Controlled Unclassified Information (CUI).

The issue: CMMC requirements are a lengthy process and expensive!

Targeting Controlled Unclassified Information (CUI) and For Official Use Only (FOUO)

Camelot Secure recognized an opportunity to streamline the CMMC process and reduce contractor costs, by focusing on files that contained the specific markings for CUI and FOUO data.

To achieve this, we developed a capability that can efficiently search for and identify these files across anyone's network.

The CMMC Document Discovery Challenge

The approach to comply with CMMC requirements was to implement the necessary security controls across the entire network. This is typically time-consuming and complex.

One of the biggest challenges for Camelot: Finding a tool that would be fast, reliable and cost effective for our compliance operational needs.

Casting "An Eye" Towards AI

- **Leveraging AI.**

- **Customization and Adaptability leveraging our E-discovery tool.**

- **Our innovative approach significantly reduced CMMC cost and complexity.**

The Results

- **Cost Savings:** Using our script tool, we've cut down secure storage needs on our network by an estimated 70%.
- **Time Savings:** Our AI tool swiftly categorizes sensitive documents, saving employees thousands of hours annually.
- **Improved Compliance:** Our tool's precise identification of sensitive data mitigates non-compliance risks, such as penalties and lost business opportunities.
- **ROI:** We anticipate an ROI several times the investment in its first year.

Thank You!

- Thank you for recognizing our rapid agile development methodology, using the powers of AI technology, to enhance business operations for CMMC compliance and–the protection of our nation's most valuable information.

- We believe that these qualities exemplify the spirit of this award, and are honored to be here receiving it.
